EXPERIENCE

Infosys Ltd.

Specialist Programmer

Hubli, India

July 2025 – Present

- **Scaled distributed microservices** to handle **10,000+ daily requests** by engineering backend systems in Go and Java, collaborating with senior engineers to ensure high-throughput inter-service communication.
- **Architected modular Micro-Frontends (MFEs)** using React, enabling independent deployments and component reuse across multiple internal teams.
- **Delivered features end-to-end across the SDLC** by gathering requirements, designing system architecture, and writing scalable, reusable code following **SOLID principles** and **Clean Architecture** patterns.
- **Reduced troubleshooting time by 30%** by integrating the **LGTM observability stack** (Loki, Grafana, Tempo, Prometheus) and centralizing log streaming from Go microservices for real-time analytics.
- **Maintained 99.9% uptime** and reduced manual deployment effort by **30%** by containerizing services with Docker and orchestrating MFE deployments on an **RKE2 Rancher Kubernetes** cluster.
- **Secured 500+ users** across 4 independently scaled product modules by implementing robust authentication and authorization using **Keycloak OAuth 2**.
- **Received an Excellence Award** for technical impact after presenting engineering innovations and high-availability solutions to senior leadership during internal hackathons.

Infosys Ltd.

Specialist Programmer Intern

Hubli, India

Feb 2025 – June 2025

- **Delivered 10+ secure REST APIs** by developing core backend microservices using Spring Boot and seamlessly integrating them with React TypeScript frontend applications.
- **Standardized artifact delivery** for Spring Boot microservices and a React 19 Vite frontend by authoring production-grade Dockerfiles and publishing versioned images to the corporate **JFrog Artifactory** registry, enabling consistent pull-ready deployments across all development environments.
- **Evaluated cloud-native object storage** by deploying **MinIO** on a Linux VM and building an end-to-end service integration POC, validating S3-compatible storage feasibility ahead of production planning.
- **Enforced fine-grained access control** on a Vite TypeScript frontend by integrating **Keycloak OAuth 2.0** with RBAC, restricting route and feature access based on user roles across multiple application modules.
- **Secured a Pre-Placement Offer (PPO)** for outstanding performance and delivering critical project milestones ahead of schedule during the 5-month internship.

EDUCATION

Indian Institute of Information Technology, Dharwad

B.Tech in Data Science and AI

Graduated July 2025

7.29/10 CGPA

TECHNICAL SKILLS

Core Systems: Distributed Systems, Micro-Frontend Architecture, Event-Driven Design, SOLID, Clean Architecture

Languages: Java, Go (Golang), Python, C++, TypeScript, SQL

Infrastructure: Kubernetes (RKE2), Docker, Apache Kafka, gRPC, GitHub Actions, Jenkins

Observability: LGTM Stack (Loki, Grafana, Tempo, Prometheus)

Frameworks: Spring Boot, React, FastAPI, Node.js, Express.js

Databases: MongoDB, PostgreSQL, MySQL, Redis

SELECTED PROJECTS

SaraRozgar — WhatsApp Job Portal | *TypeScript, Node.js, Gemini AI, gTTS*

- **Bridged the digital divide for India's blue/gray-collar workforce** by engineering a conversational job portal via WhatsApp, enabling job discovery and application through low-bandwidth, voice-first interfaces for non-tech users.
- **Architected a voice-first AI portal** supporting English, Hindi, and Kannada, processing multimodal inputs (text/audio) via Gemini 2.0 API.
- **Engineered a fault-tolerant AI pipeline** with a 3-model fallback strategy, ensuring **zero data loss** and 100% availability during API rate limiting.
- **Enhanced job-matching precision** by implementing geo-filtering (Haversine), reducing irrelevant results by **50%** for 1,000+ test users.

ACHIEVEMENTS & CERTIFICATIONS

· **Postman API Fundamentals Expert** Badge · **Advanced React.js** (Meta) · **ML Specialization** (DeepLearning.AI)
· **SWE Job Simulation** (J.P. Morgan)
